

PROFIX 30

Supply and installation of a primer based on micronised acrylic resins in aqueous dispersion capable of penetrating deeply into the substrate, producing a high fixative effect and homogenising absorption.

The product must be used for the preparation of mineral or synthetic substrates, both external and internal, before applying subsequent coatings, finishes or waterproofing products.

The material must have the following characteristics:

Specification	Values
<i>Appearance</i>	Whitish liquid
<i>Specific weight</i>	1 kg/l
<i>Viscosity (+20 °C \neq 2-100 rpm)</i>	20 mPa x s
<i>Workability time at +20 °C</i>	30'
<i>Dry residue</i>	approx. 30%

as well as Profix 30 Volteco or a product with equal or superior characteristics.

The technical data must be supported by test certification issued by an accredited official laboratory and / or be subjected to quality control according to ISO 9001.

For further details on the individual products and installation specifications, refer to the relevant technical data sheets which can be downloaded in the updated version on the website www.volteco.com.
